ResultsComputerTraining.com

Learn to use the software you need.

We teach all versions of Microsoft Office applications (Word, PowerPoint, Excel, Outlook, Access, Publisher) and QuickBooks desktop.

Advance your skills, no matter your experience level.

Regardless of how much you already know, we can help take your skill level as high as you want it to go.

Training is tailored to you.

Helping you achieve your goal is our No. 1 priority, so we customize our training to your needs. We won't waste your time teaching you things you already know. We'll assess your skill level and map out a way to get you to your goal. We provide one-on-one tutoring or teach to a classroom of people.

Get training from the pros.

Receive training from an expert who will clearly teach you exactly what you want to know. We use industry-standard training materials and have over 25 years of experience in software training for corporations, government entities and individuals.

We've got your back!

You'll receive training books and handouts to help you use your new skills, and if you get lost, we're still here for you! All clients receive three free support phone calls or emails with each class, so you can be confident in your new skills after the class is done.
